WRW Ruger

Hey - a pied buck with something going on! Jon E. is a 2-1/2 year old out of one of our John sons bred to a Mad Max daughter. If you are interested in something new try a few pieds to mix things up. For those unaware, the genetics of pieds express much like the whites, which actually dominate, resulting in a 50% expression rate in fawns produced. You never know what color pattern you may see.
